## Activity 9

### Topic : Interior and Exterior Angles of a Triangle

#### Objective

Using cutting and pasting method, show that an exterior angle of triangle is equal to the sum of its interior opposite angles.

#### Pre-requisite Knowledge

- (i) Knowledge of a polygon and its components.
- (ii) Concept of exterior and interior angles of a triangle.
- (iii) Knowledge of a straight angle.
- (iv) Knowledge of adjacent angles.

#### Materials Required

- A tracing paper
- A thick paper, A scale
- A pencil, Sketch pens
- A pair of scissors
- A sheet of white paper, Fevicol.

#### Procedure

- I. Draw a triangle ABC on a thick sheet of paper.

- II. Extend its side AB such that an exterior  $\angle CBD$  is formed.
- III. Paint  $\angle A$ ,  $\angle C$  and  $\angle CBD$  with different colours.

IV. Trace  $\angle A$  and  $\angle C$  and take their cut-outs.

V. Arrange and paste the cut-outs of  $\angle A$  and  $\angle C$  side by side such that their vertices coincide with the vertex of exterior  $\angle CBD$  as shown below:

### Observations

- (i)  $\angle A$  and  $\angle C$  together exactly cover the exterior  $\angle CBD$   
i.e.,  $\angle A + \angle C = \angle CBD$
- (ii) If we extend other sides, and repeat the above steps, then we get the similar results.

### Conclusion

In a triangle, exterior angle is equal to the sum of interior opposite angles.

### Suggested Activity

1. Using paper cutting and pasting, show that an exterior angle of a triangle forms a linear pair with its adjacent interior angle.

### Viva Voce

- Q1.** If an exterior angle of a triangle is  $105^\circ$ , what is the sum of its interior opposite angles?  
**Ans.**  $105^\circ$
- Q2.** The measure of an exterior angle of a triangle is  $110^\circ$ . What is the measure of its adjacent interior angle?  
**Ans.**  $70^\circ$

**Ans.**  $140^\circ$

**Q4.** What is the measure of each angle of an equilateral angle?

**Ans.**  $60^\circ$

**Q5.** Each of the interior angle of an equilateral angle is  $60^\circ$ . Is each of its exterior angles equal?

**Ans.**  $120^\circ$

**Q7.** In the figure what is the value of  $x$ ?

**Ans.**  $90^\circ$

**Q8.** Three angles of a triangle are in the ratio of 3 : 4 : 5. What is the measure of the exterior angle adjacent to its smallest angle?

**Ans.**  $135^\circ$

**Q9.** If the greatest angle of a triangle is  $100^\circ$  then what is the measure of its adjacent exterior angle?

**Ans.**  $80^\circ$

**Q10.** What is the sum of an exterior angle and its adjacent interior angle of a triangle?

**Ans.**  $180^\circ$
